

# Course Set "Ventilation + Heating"

**Бренд:** Ольга Клинецвич  
**Артикул:** VDC-0014

**Цена:** ~~\$ 300.00~~ \$ 240.00

## Short Description

Are you planning to design engineering networks? Then you need to use this kit!

## Описание

### What's included?

The set includes these video courses:

- [Ventilation systems design \(rus.\)](#)
- [Hydraulic calculation of heating systems using specialized programs \(rus.\)](#)
- Additional materials for both courses: document templates, design examples, equipment specifications, etc.

These video courses will introduce HVAC engineers to the ventilation system design algorithm and the hydraulic calculation of heating systems. What the project consists of, what calculations must be performed, which design standards to focus on - you will find answers to these and other questions in these author's courses.

## Courses are recommended

- students of the specialty "Design of heating, ventilation, air conditioning systems" (HVAC)
- HVAC engineers

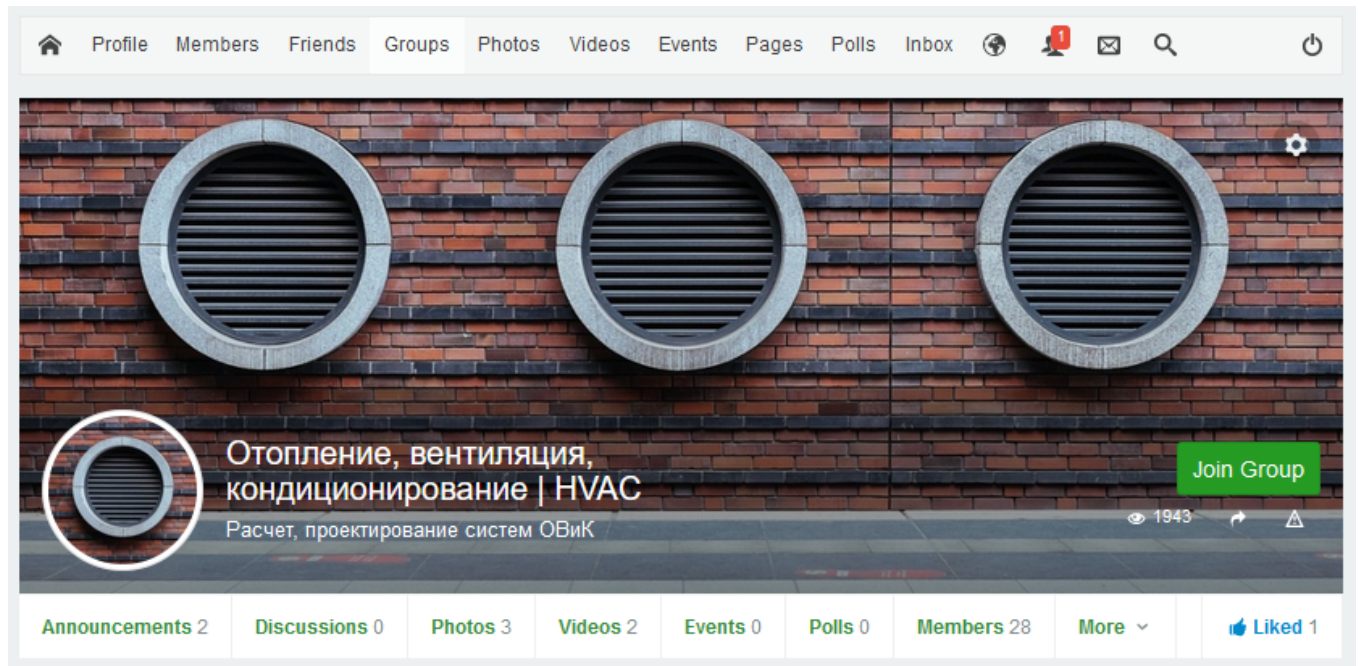

- anyone who wants to expand their understanding of HVAC system design

## Course language

Russian

## Training and support

{module 273}

## Характеристики

Общие характеристики продукта	
Язык продукта	русский
Сфера применения, система знаний	
Связанная система знаний	математика
Связанная система знаний	гидравлика
Связанная система знаний	проектирование
Сфера применения	ОВиК
Программное обеспечение и файлы продукта	
Программное обеспечение	Autodesk AutoCAD
