

LVL Beam Calculator

Виробник: Designal Inc.

Артикул: TEC-CNTN-DOC-0002

Вартість: \$ 24.99

Short Description

TechEditor application for automated calculation of LVL beams

Опис

TechEditor application for automated calculation of LVL beams. User can choose section, length and material of the beam. Design scheme is a simple beam on two supports. Free concentrated or distributed loads can be applied to the beam. The app has the option to automatically take into account the self-weight of the beam. To enter the input data, engineer can use different units (both imperial and metric).

Based on the calculation results, a mini-report is generated (included checking by bending moments, shear forces, deflections).

Design Code: Ontario Building Code 2012, Canada

LVL catalog:

http://www.hitec.ca/resources/LP_EWP_LVL_2250_2400_2650_2950_Professional_Brochure_Canadian.pdf

Works in TechEditor 1.x version.

Характеристики

Загальні характеристики продукту	
Мова продукту	англійська
Програмне забезпечення та файли продукту	
Операційна система	Windows 7, 8, 10 (32/64)
Програмне забезпечення	Dustlab TechEditor 1.x
Формат файлу	TEC (TechEditor)
Стандартизація та супровід продукту	
Відповідає нормам	OBC12 (Ontario Building Code 2012)
